

## Get oriented

If you're familiar with Internet Explorer, you'll have no trouble getting going with Microsoft Edge. Here are the basics.

The image shows a screenshot of the Microsoft Edge browser interface. The browser window displays the Bing homepage with a search bar and navigation links. The address bar shows the URL 'bing.com/?toHttps=1&redig=E48A01FEBDE74896A3391492A97E000E'. The interface includes a back button, a refresh button, and a star icon for bookmarks. The navigation bar at the bottom contains links for Images, Videos, Maps, News, Explore, Search History, MSN, Office Online, and a user profile for Thomas. The background of the page is a scenic landscape with mountains and a blue sky.

**Back and Forward**  
Where you expect 'em.

**Address bar**  
Same location.

**Add a favorite...**

**...see your favorites**

**Refresh**  
We moved this and made it bigger.

**Reading view**  
This is new. It changes pages for easier reading.

**Add your notes**  
Draw on this page or take a note.

**Don't see what you need? Look here.**

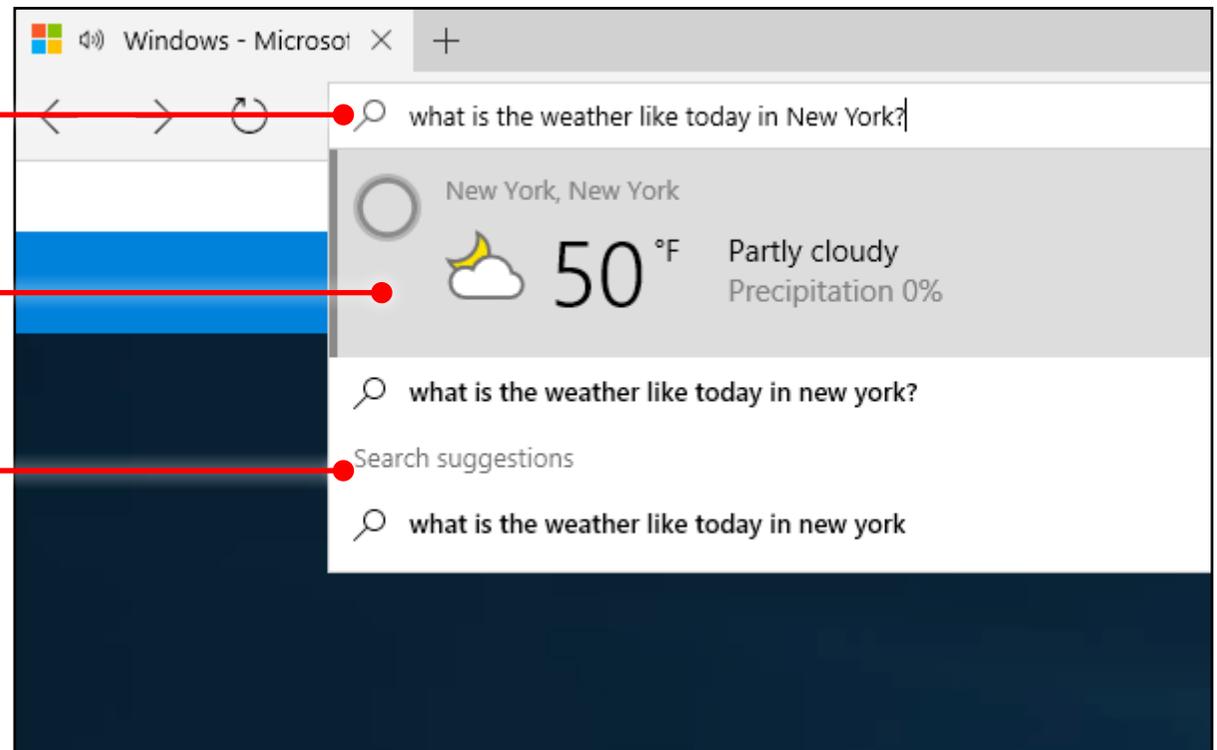

Microsoft Edge makes finding the needles in the internet's haystack faster and easier.

Find answers quickly by typing your question in the address bar. If we've got the answer, we'll show it to you or make a suggestion.

1. Ask your question in the Address bar

2. Find your answer here

3. See other options here

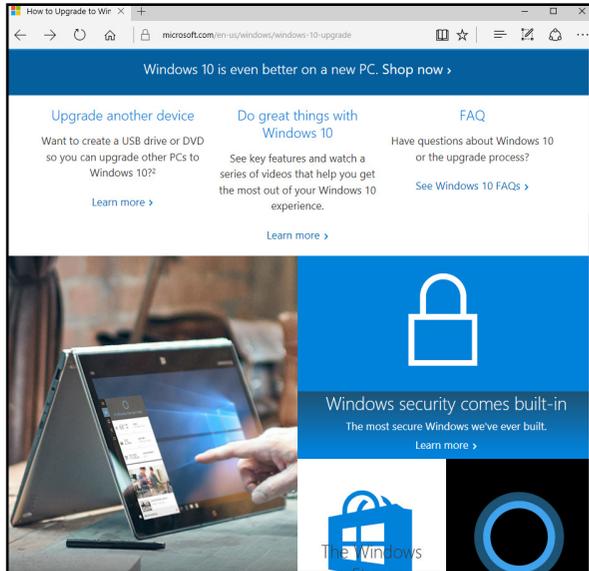

# Quick start: Microsoft Edge

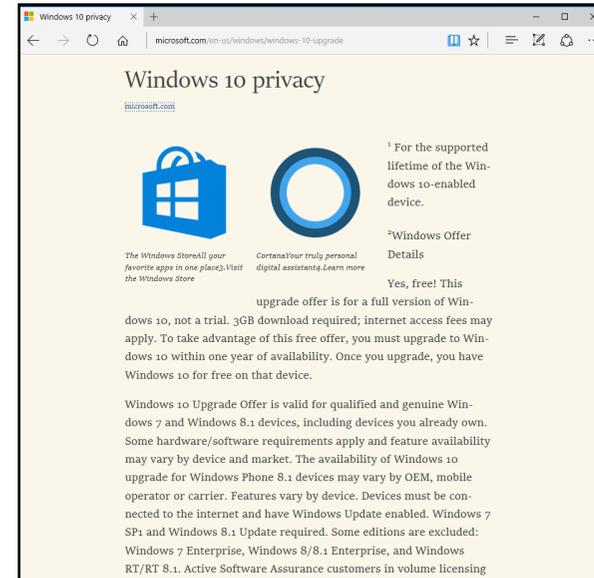

If you've got a lot of web reading to do, switch to Reading view  and give your eyes a break.

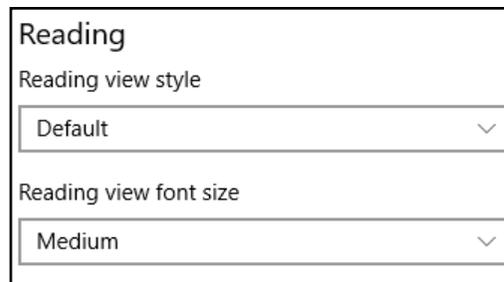

## Before

## After

Need more contrast or a bigger font? To change settings, select More  in the upper-right corner, select Settings, scroll to the Reading section and play with the options.

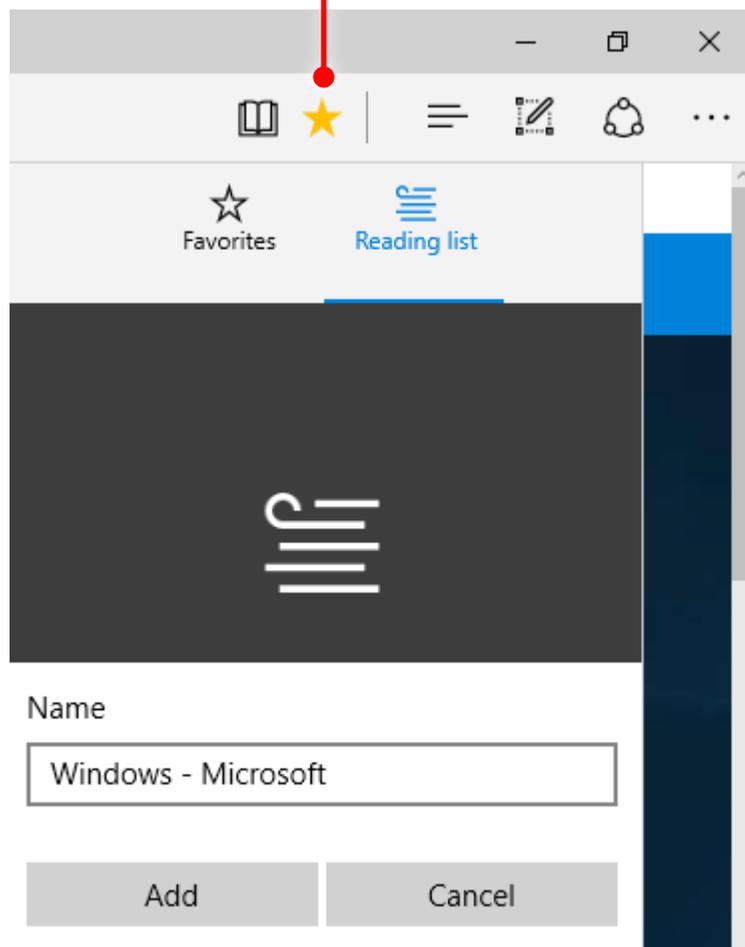

# Quick start: Microsoft Edge

If you don't always have internet access, add webpages that you want to read later to your Reading List and you'll be able to get to them offline, too.

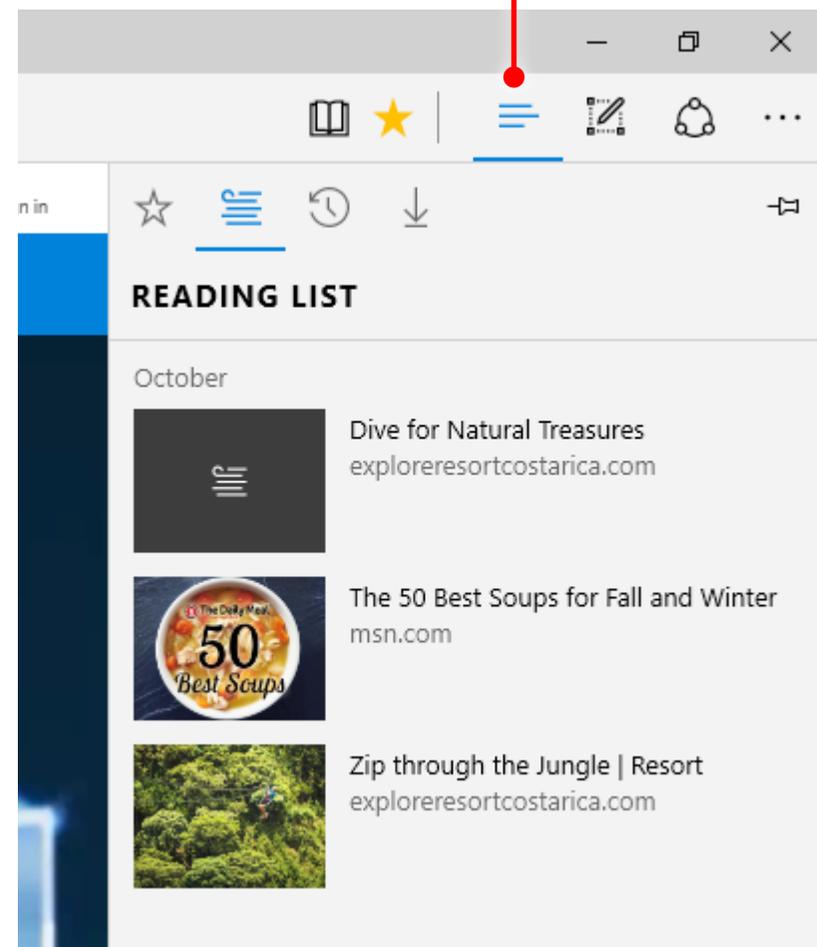

## 1. Add things to the list

Open a webpage > select the Favorites button ☆ > Reading list > Add.

## 2. Open the list

Hub button ≡ > Reading list ≡.

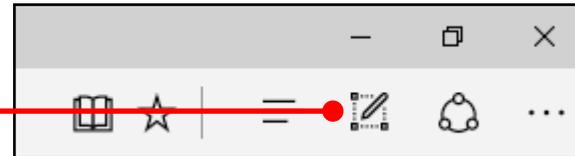

# Quick start: Microsoft Edge

Want to take notes or draw on a page and then share it?

Select Make a Web Note   
It's in the upper right.

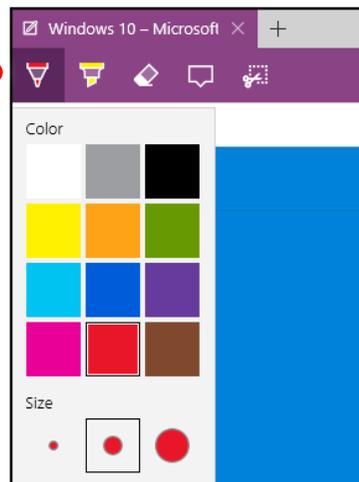

The new toolbar appears at the top of the page.

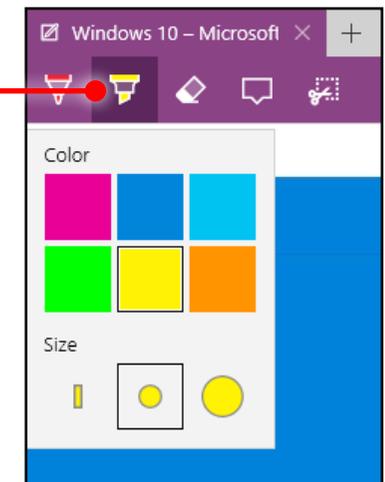

Pick a writing tool over here on the left

Select the Pen   
button to change the  
color and size.

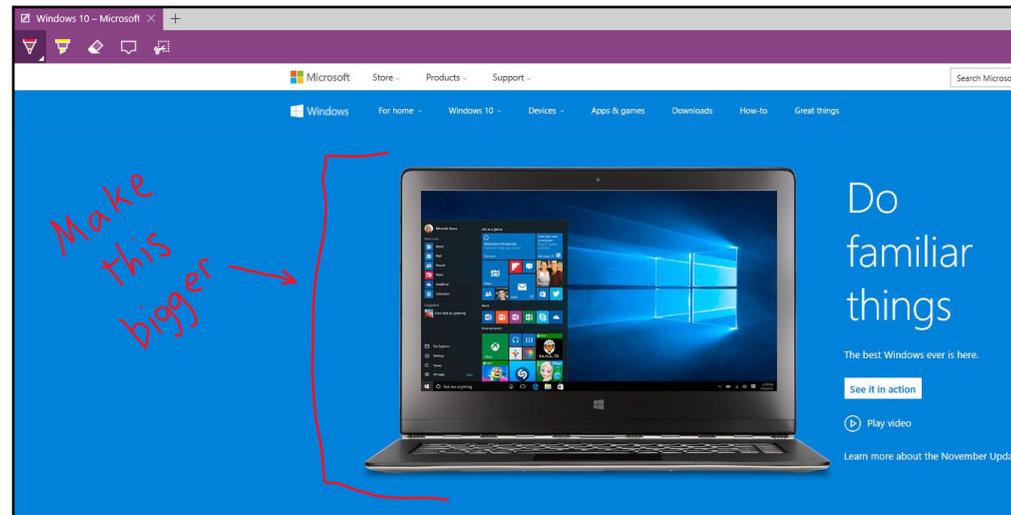

The Highlighter   
next to the Pen   
button works the  
same way.

# Quick start: Microsoft Edge

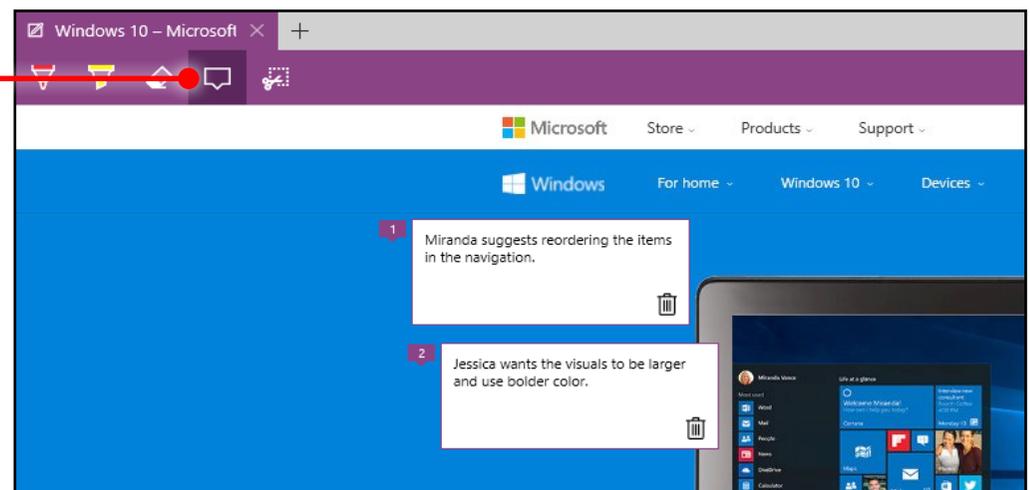

Use a pen or finger on a touch screen, or even use a mouse as we did here:

Don't have a touch screen? Have a lot to say? Type it.

## Add a comment

Select Add a typed note  and tap or click where you want the comment to appear.

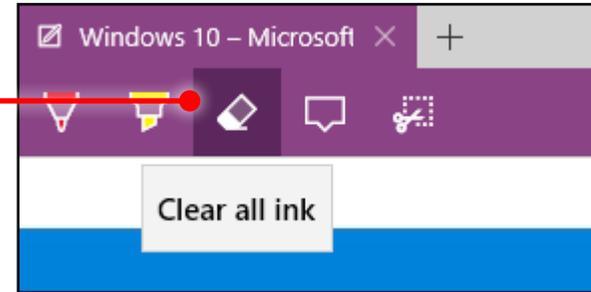

Made a mistake? Erase it. Got an insight? Share it.

Erase just a part or everything at once

Select the Eraser  and start removing a single line at a time with your finger, stylus, or mouse.

Or select the Eraser , select Clear all ink, and get rid of everything at once.

Better when shared

When you're done editing, share the whole thing , save everything , or clip  just a piece and paste it in an app or email.

Done? Exit is on the right

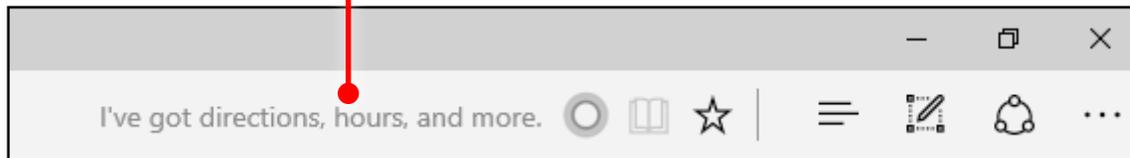

You don't need to close the Edge browser window to stop writing on a webpage. Select Exit to close the Web Notes toolbar.

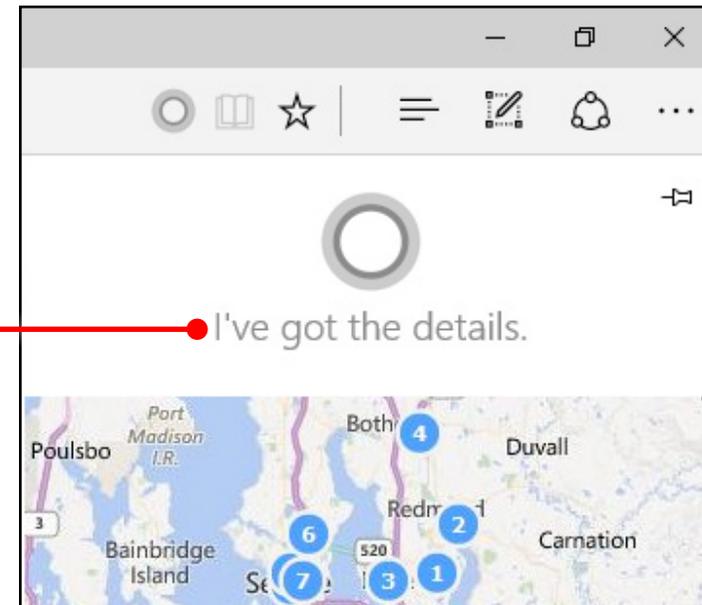

## Already using Cortana as your personal assistant?

She's there to help when you use Microsoft Edge, too. When you're on a page, Cortana figures out what the likely next steps are and is ready to show you the info you'll probably want next.

Select this ...

...to get more info without leaving the page

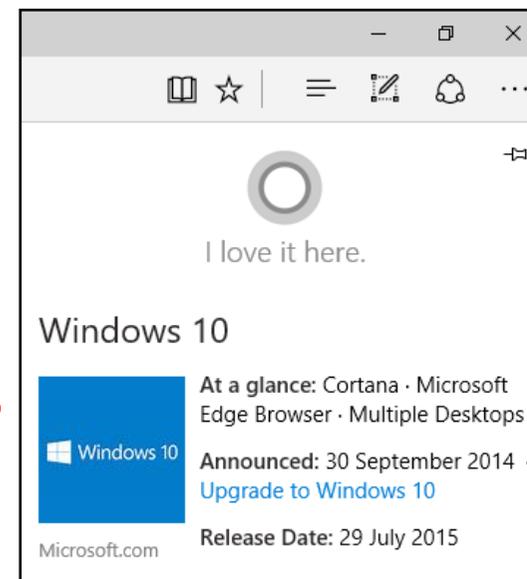

And if you're reading something online and want to know more about it, Cortana has the answers.

1. Select some text and press and hold (or right-click it)

2. And then select Ask Cortana

3. See Cortana's answers on the same page

## Quick start guide for info workers

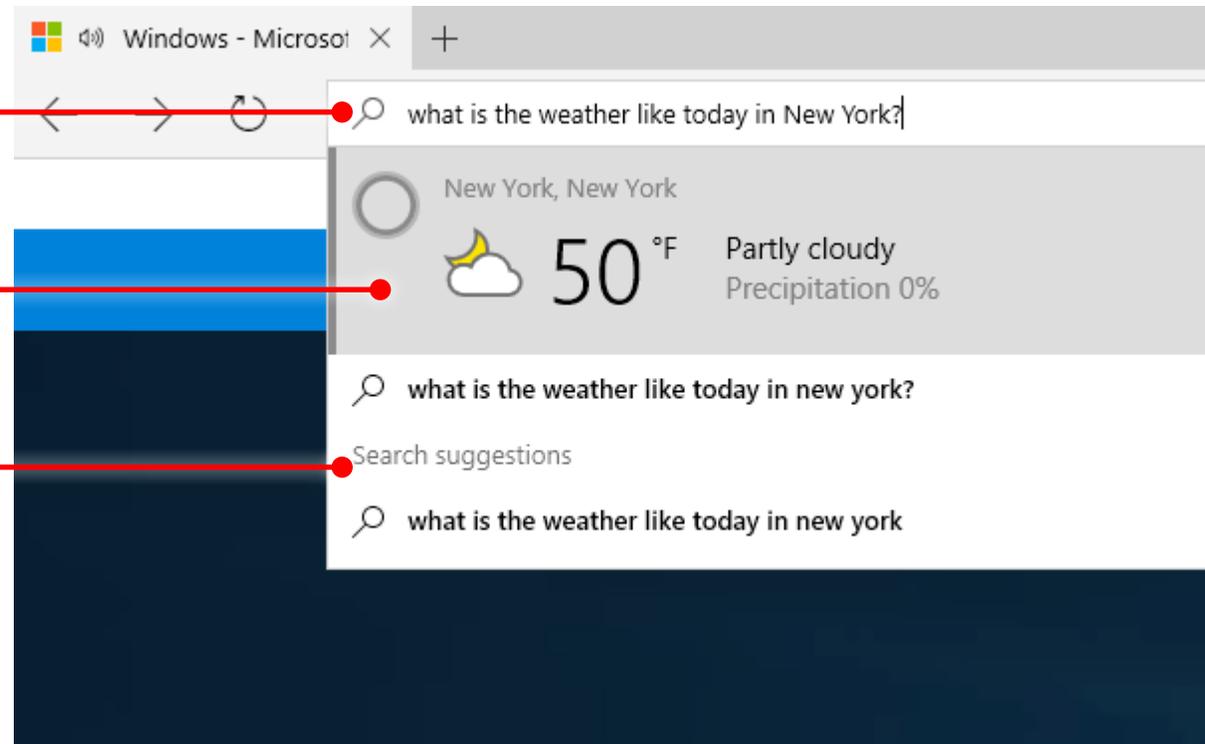

Microsoft Edge makes it faster and easier to find the needles in the internet's haystack.

Type your question in the address bar and, if we've got the answer, we'll show it to you. For example, if you're going to New York on business and need to know what to pack...

**Ask your question in the address bar**

**Find your answer here**

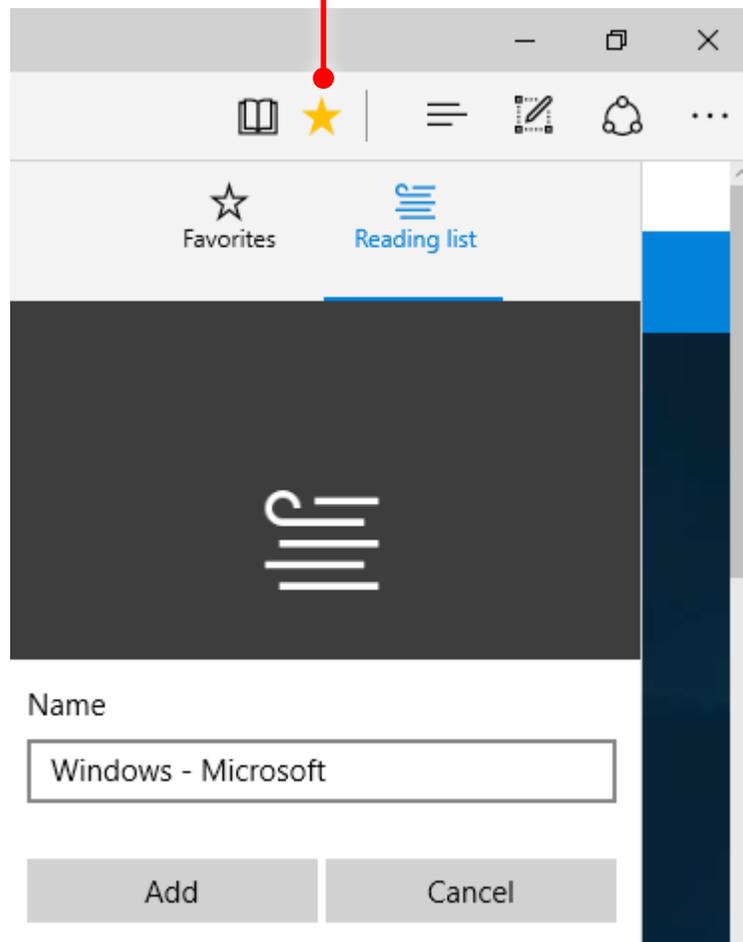

**See other options here**

If you don't always have internet access, add webpages that you want to read later to your Reading List and you'll be able to get to them offline, too.

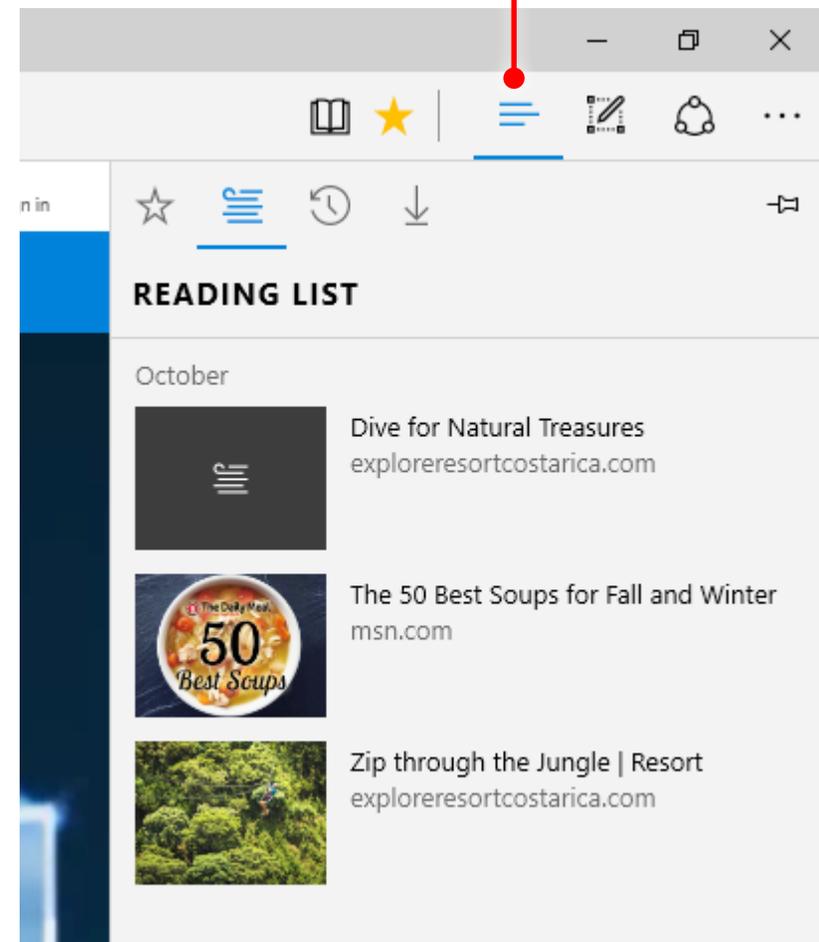

## 1. Add things to the list

Open a webpage > select the **Favorites** button ☆ > **Reading list** > **Add**.

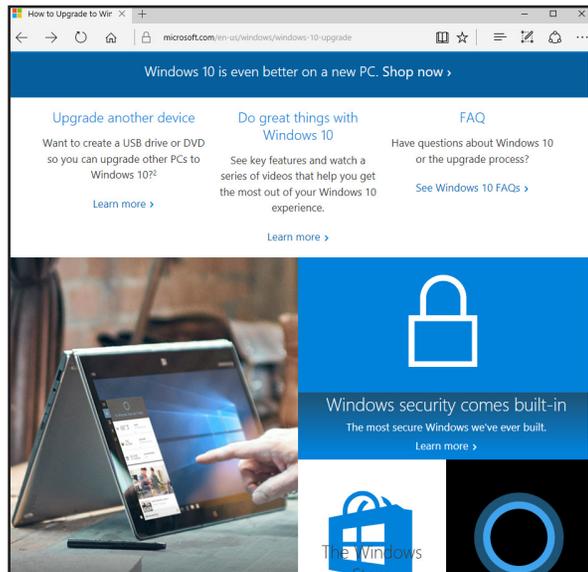

## 2. Open the list

**Hub** button ≡ > **Reading list** ≡.

If you've got a lot of web reading to do, switch to Reading view  and give your eyes a break. It reformats the page so you can increase reading speed and comprehension with less strain. You can tweak the font style and size of Reading view to your preferences.

Before

After

To change settings, select **More**  in the upper-right corner > **Settings** > scroll to the **Reading** section and play with the options.

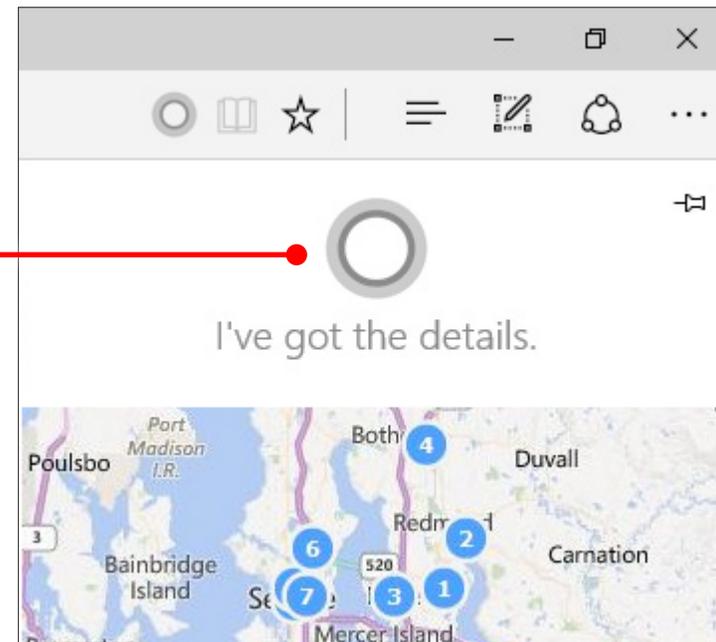

Already using Cortana as your personal assistant at the office?

She's there to help when you use Microsoft Edge, too. When you're on a page, Cortana figures out what the likely next steps are and is ready to show you the info you'll probably want next.

Select this link...

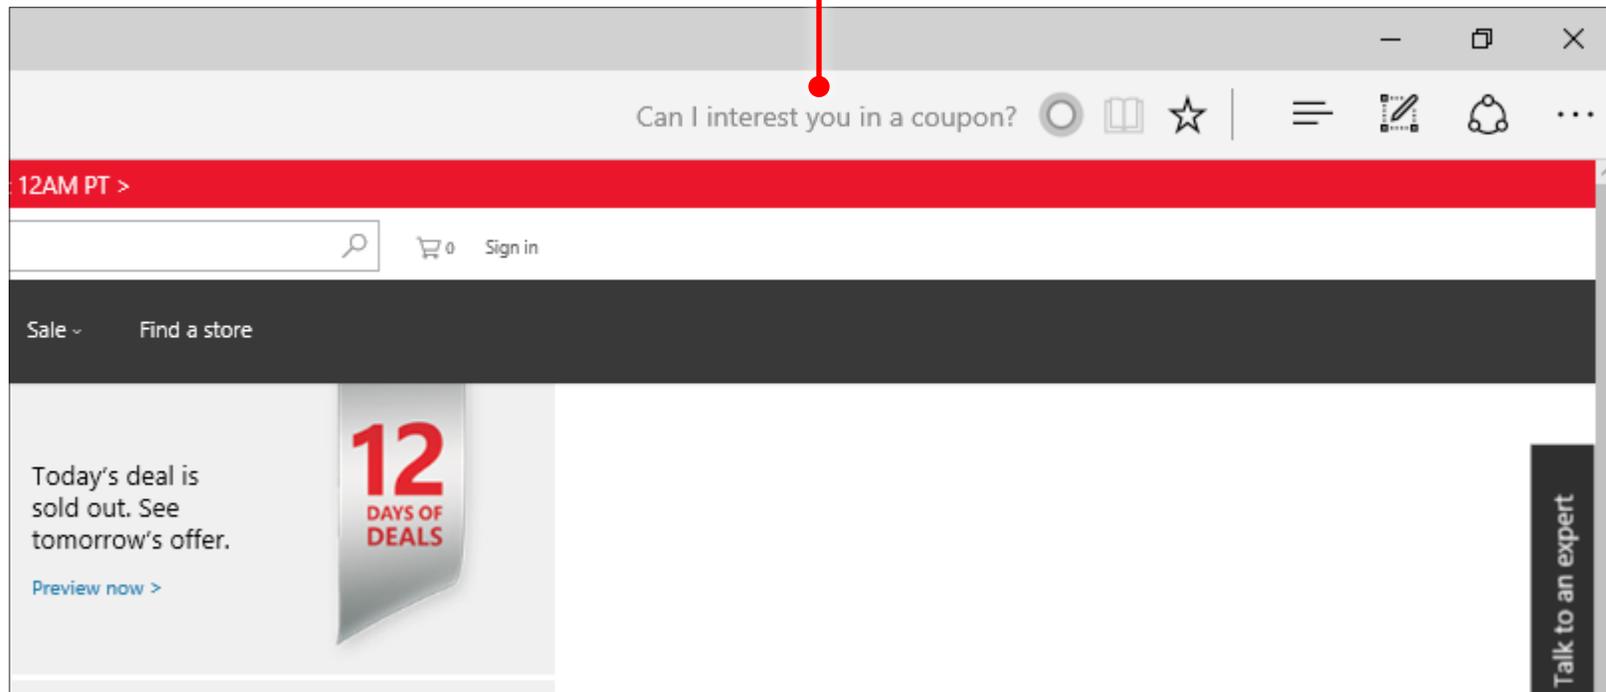

...to get more info without leaving the page

If you're shopping online for office supplies, business travel, or another expense, Cortana might be able to save your company some money by giving you coupons.

## See what you can save

Cortana offers coupons for many major retailers.

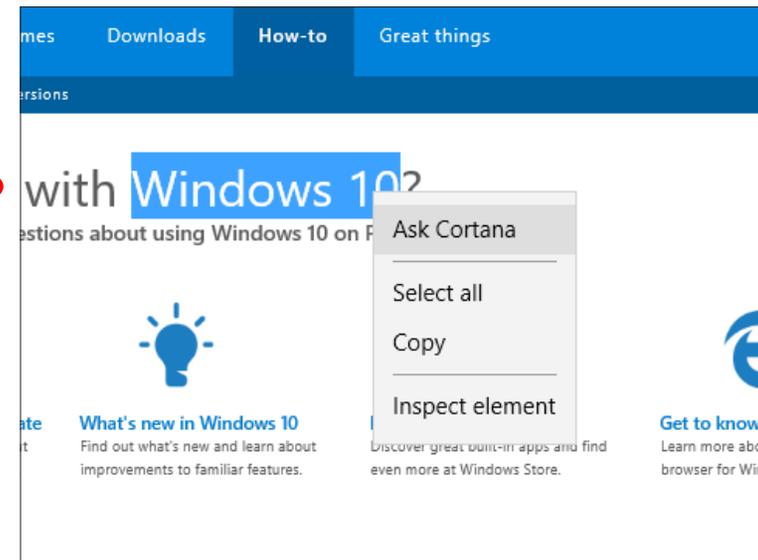

# Find it faster with Microsoft Edge

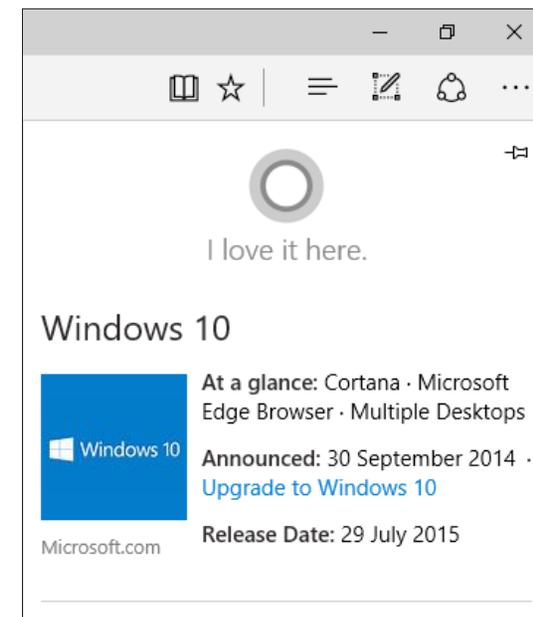

And if you're reading something online and want to know more about it, Cortana has the answers.

**Select some text and then right-click it  
(or press and hold)**

In this example, "Windows 10" is selected.

**See Cortana's answers on the same page**

## Quick start guide for info workers

Project your webpage to quickly collaborate during a meeting, take notes on it that everyone can see, and then share them in an app or send them in email. Here's how...

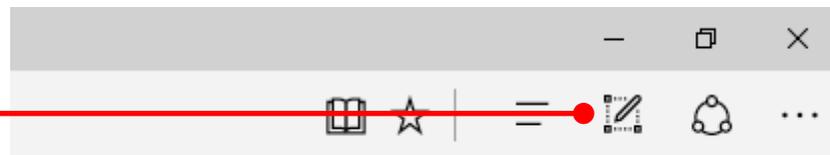

1. Open Microsoft Edge  
It's on the left side of the taskbar.

2. Enter an address

3. Select Make a Web Note   
It's in the upper right.

# Use Microsoft Edge to collaborate

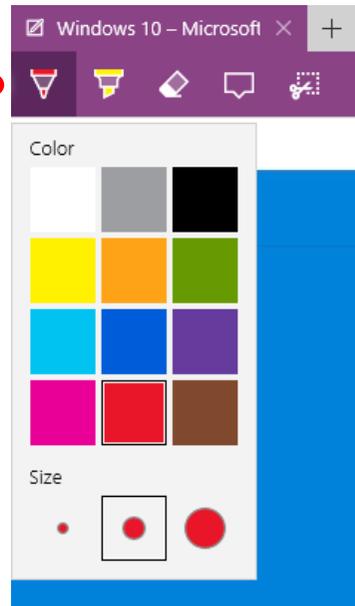

The new toolbar appears at the top of the page.

Pick a writing tool over here

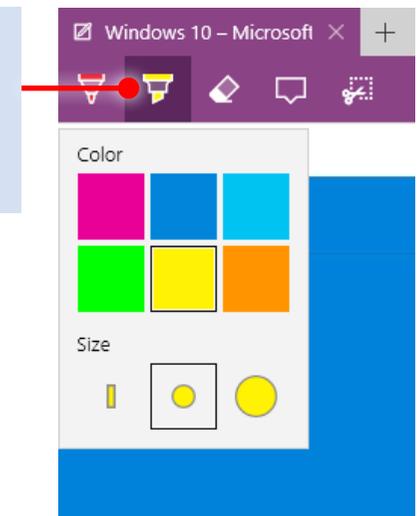

Save and share what you've done over here

Much more than just a red pen...  
But it's what's set by default.  
Select the Pen  to change the color and size.

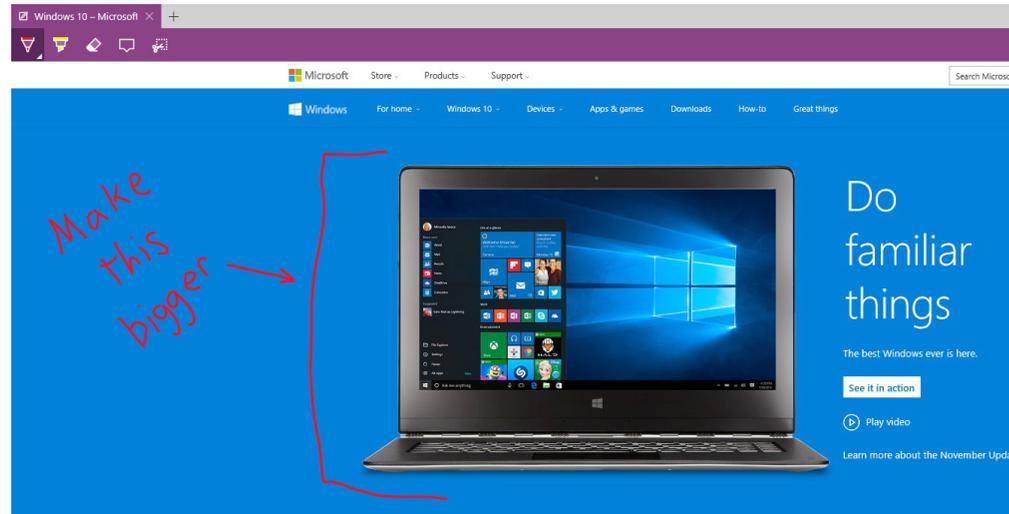

The Highlighter  next to the Pen  works the same way

# Use Microsoft Edge to collaborate

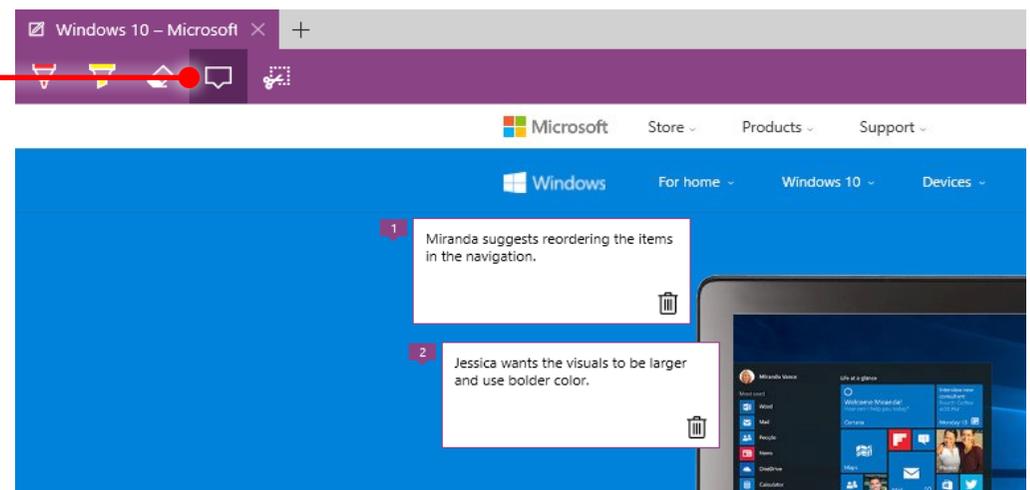

Use a pen or finger on a touch screen, or even use a mouse as we did here:

Don't have a touch screen? Have a lot to say? Type it.

## Add a comment

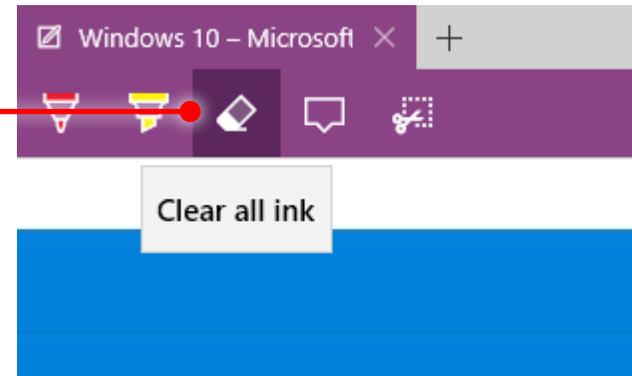

Select Add a typed note  and tap or click where you want the comment to appear.

## Made a mistake? Erase it.

Erase just a part or everything at once  
Select the Eraser  and start removing a single line at a time with your finger, stylus, or mouse.

Or select the Eraser  again, select Clear all ink, and get rid of everything at once.

When you're done editing, share the whole thing , save everything , or clip  just a piece and paste it in an app or email.

Clip with this button 

Share using this button   
More about this on the next page...

Save with this one 

# Use Microsoft Edge to collaborate

The sharing options available to you depend on what's available on your work PC.

You'll see the list of apps here

The image shows a screenshot of the Microsoft Edge browser interface. The main content area displays the Windows 10 slogan: "Do unexpected things" with the subtext "The best Windows ever is here." and a "See it in action" button. A sharing menu is open on the right side of the browser window. The menu is titled "Share" and shows the current page as "Web Notes - Windows 10 - Microso...". Below the title, a list of sharing applications is displayed, each with its icon and name: Drawboard PDF, Dropbox, Facebook, Fresh Paint, Mail, OneNote, and Photo Editor. A red line with a dot at the end points from the text "You'll see the list of apps here" to the top of the sharing menu.

## Done? Exit is on the right

You don't need to close the window  
Select Exit to stop writing on a page and close the  
Web Notes toolbar.
